

Call don't fall

Ask the B.I.G Question

- Are your patients at risk of a fall if they reach for their belongings? We can all help to minimise this risk by asking the B.I.G question at the end of every patient interaction.
- **B**- Before
- **I** – I
- **G** -Go
- We can ask patients “Before I go, is there anything I can pass you?” This can help reduce the number of injuries caused by patients trying to reach their belongings / drink / call bell.
