Advance Emergency Planning Facilities Information Treatment Escalation Information Training Family Plans Family Plans Family Fam

Patient

Talk to the patient and document the conversation and ensure informed consent is undertaken prior to procedures.

Resuscitation Have conversations/decisions been undertaken and documented? Does the patient already have a UNDNACPR / Respect or other form of documented in place. Is it clearly noted in the patient's electronic notes?

Escalation Are there any escalation of treatment options clearly documented and the ceilings of treatment clear? Have conversations with the patient and/or family/carer been undertaken and any wishes clearly documentated within EPR?

Advance Care Planning (ACP) Is there an ACP document in place? If yes request a copy to review and scan to notes. If no, is there an oppportunity for one to be completed to document a patient's and if appropriate families/carers wishes?

Training Have you and those involved with decision making completed the appropriate training to do so? ACP, mental capacity, DNACPR, best interest, consent, communication skills etc.

Mental Capacity Do you think the patient lacks capacity? Has an assessment been undertaken and documented? Do you require a best interest meeting and document the outcome using the best interests document? Do you need to involve an IMCA?

Emergency Planning Have "what if conversations" taken place and been documented during the informed consent conversations? If recovery is uncertain are out of hours plans documented?

Next of kin (NOK), family Has NOK been identified by the patient? Are they involved with planning if the patient has given consent?. Are they fully informed? Are the correct details documented on EPR? Do you know who to contact out of hours? Have you taken a second contact?

Transfer information Communicate patient wishes and treatment escalation with patient consent on transfer to other clinical settings, secondary care or primary care. Ensure GP is informed of decisions or patient wishes on discharge.
