

RED TO GREEN *WITH THE ECIST TEAM*

TOP TIPS

Board Rounds

Safer Patient Flow Bundles

The key is to link flow, safety and reliability with visual demonstration using a 'Ward Improvement Board'

Keep it simple - tell people - it's not rocket science. **DO NOT PERFORMANCE MANAGE!!**

Keep the huddles to 15-20 mins - any longer and attendance drops!

Keep the huddle light hearted - have fun negotiating for greens.....but hold firm on principles.

Embed the process "This is how we do things on our ward". This will help, especially on Dr change over weeks

Red to Green is a simple initiative that helps turn patients' 'red days' into value-adding 'green days' which help to facilitate a safe discharge from hospital.
